

a) Layout for an MPP platform running 2 processes $((4,0), (3,0))$

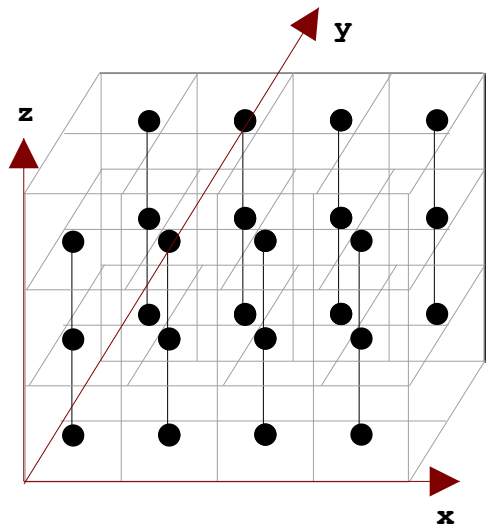

b) Layout with 3 SMP nodes (i.e.) each running 4 processes (i.e.): $((4,1), (3,0))$

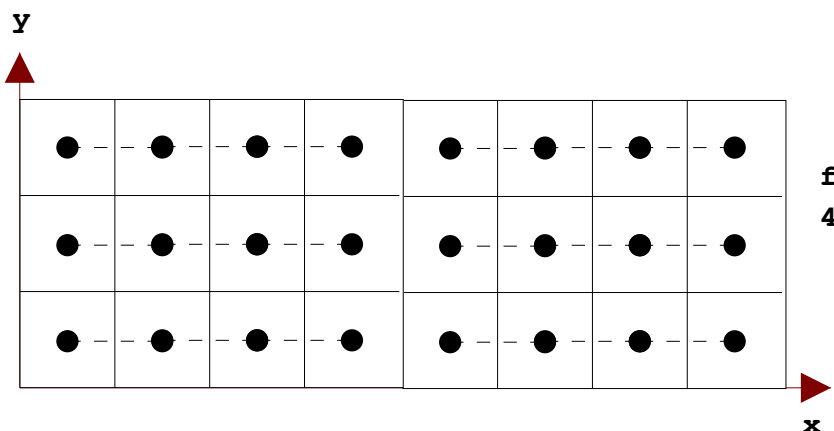

c) Layout with 3 SMP nodes (i.e.) each running 4 processes and 4 threads (i.e.): $((4,2), (3,0))$

d) Layout with 12 threads running on a single node, with periodic boundaries: $((4,2)P, (3,2)P)$

e) Layout with 8 nodes each running 3 processes and 3 threads: $((4,0), (2,0), (3,2))$

f) Layout with 6 nodes each running 4 processes $(2(4,1), (3,0))$
